

		SOP on Request and Fulfillment of IT Equipment	<i>Policy No</i>	ABBD/IT/SOP/01
			<i>Effective Date</i>	November 10, 2025
<i>Author</i>	ABBD HR, AS-SA		<i>Revision No</i>	0
<i>Approval</i>			<i>Approve Date</i>	November 10, 2025

1. Purpose

This Standard Operating Procedure (SOP) defines the global process for requesting and fulfilling IT peripheral equipment including mouse, keyboard, headphone, monitor etc through the ServiceNow catalog. The procedure ensures standardized validation, approval, and issuance of IT equipment across all Avery Dennison sites.

2. Scope

This SOP applies to all Avery Dennison Bangladesh employees who require IT peripherals for business use, including replacement due to malfunction, damage, or loss.

3. Responsibilities

Role	Responsibility
Requester (Employee)	Initiates the equipment request through the ServiceNow catalog and provides accurate justification.
Line Manager	Validates and approves the request to ensure business necessity.
Site IT Lead	Reviews and approves the request based on IT policies and available inventory.
Local IT (Bangladesh)	Provides the approved equipment and closes the ServiceNow fulfillment task.

4. Procedure

Step 1: Request Creation

- The employee accesses the IT Equipment Request Catalog in ServiceNow:
https://averydennison.service-now.com/esc?id=sc_cat_item&sys_id=361eee60db168050bfc815174896194f&table=sc_cat_item
- Select the request type: a. Request Computing equipment and accessories or b. Request new desk phone and accessories, required item(s): *Mouse, Keyboard, Headphone, Scanner* etc.
- Provide a valid reason for the request — for example:
 - Equipment is broken or damaged
 - Equipment is not functioning properly
 - Equipment is lost or missing

<i>Approval</i>			<i>Approve Date</i>	November 10, 2025

4. Submit the request for approval.

Step 2: Line Manager Approval

1. The request automatically routes to the requester's Line Manager.
2. The Line Manager reviews the justification and approves or rejects the request based on necessity and policy compliance.

Step 3: Site IT Lead Validation

1. Upon Line Manager approval, the request is routed to the Site IT Lead.
2. The Site IT Lead validates the request according to IT standards and approves it for fulfillment.

Step 4: Local IT Fulfillment

1. After both approvals, a ServiceNow Task (SCTASK) is automatically generated and assigned to the Bangladesh Local IT team.
2. The Local IT team prepares and delivers the requested equipment to the employee.
3. Local IT updates the task with delivery details and marks it as Completed/Closed in ServiceNow.

5. Common Request Scenarios

Issue Type	Description
Broken Device	Mouse, keyboard, or headset physically damaged or unusable.
Not Functioning	Device not working correctly despite troubleshooting.
Lost Item	Item misplaced or lost, requiring replacement.

6. Notes

- This process follows the global proactive IT equipment procedure, applicable across all Avery Dennison sites.
- All requests must undergo complete validation and approval before fulfillment.
- Employees are responsible for providing truthful and complete information when submitting requests.
- Replacement of lost items may be subject to additional review or cost recovery based on company policy.
